

Outline for a two-day training module on Textile/RMG waste management planning:

Day 1:

Session 1: Introduction to Textile/RMG Waste Management

Understanding the types and sources of textile/RMG waste
Impacts of textile/RMG waste on the environment and public health
Overview of textile/RMG waste management options

Session 2: Waste Auditing

Understanding the importance of waste auditing
Methods for conducting waste audits
Data collection and analysis

Session 3: Waste Reduction Techniques

Identifying opportunities for waste reduction in the textile/RMG industry
Introduction to the 3Rs (Reduce, Reuse, Recycle) and their application
Developing a waste reduction plan

Day 2:

Session 4: Recycling Techniques

Introduction to textile/RMG recycling techniques
Benefits and challenges of textile/RMG recycling
Strategies for implementing recycling programs in the textile/RMG industry

Session 5: Waste Management Plan Development

Developing a comprehensive waste management plan
Creating policies and procedures for waste management
Implementation strategies and monitoring and evaluation of the plan

Session 6: Best Practices for Textile/RMG Waste Management

Sharing success stories and case studies of textile/RMG waste management
Discussion on best practices for textile/RMG waste management
Q&A session for participants to ask any remaining questions

The training module can be designed to include interactive activities, group discussions, and case studies to make it more engaging and interactive for the participants. The module can also include site visits to textile/RMG factories or waste management facilities to provide a practical understanding of the challenges and opportunities for waste management in the industry.
